

2014 U.S.-China Energy Forum

Time: Monday, October 27th, 2014 from 5:30 PM - 7:00 PM

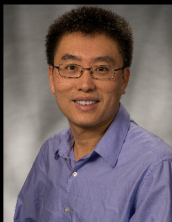

Location: Debartolo 141 (Free pizza and drink will be provided)

Led by the two world largest economies - U.S. and China, the world is undertaking a feasible but challenging plan of clean energy transition, which often involves risk/reward trade-off among policy makers, investors, private sectors and academia between and within the two countries. What should be changed in the future to break these barriers?

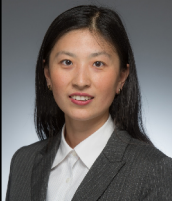

In this event, four ND faculty members with different backgrounds (engineering, economics, law and finance) will collaborate to share insights from different angles to unveil the panorama of this game-changing trend led by China and U.S. The forum includes presentations, followed by a 30-min Q&A session. Students and faculties from any departments are welcome to join our discussion.

Moderator: Bo Hong, president of Notre Dame Chinese Student & Scholar Association

Panelists:

Jianhui Wang is an adjunct professor at University of Notre Dame and energy system engineer at Argonne National Laboratory. He has authored/co-authored more than 150 journal and conference publications. He is an editor of the IEEE Transactions on Power Systems, the IEEE Transactions on Smart Grid, an associate editor of Journal of Energy Engineering, an editor of the IEEE PES Letters and an editorial board member of Applied Energy.

Juliana Chiang will join the Department of Economics here at the University of Notre Dame in January 2015 as an Assistant Professor of the Practice. She holds a Ph.D. in Environmental and Natural Resource Economics (Yale University). Previously, she served as a consultant for the Prototype Carbon Finance Unit at the World Bank and on several water projects in China with the World Bank Institute.

John Copeland Nagle was the law school's inaugural Associate Dean for Faculty Research from 2004 to 2007. Professor Nagle is the co-author of casebooks on "The Practice and Policy of Environmental Law," "Property Law," and "The Law of Biodiversity and Ecosystem Management. Professor Nagle teaches a number of courses related to environmental law, legislation, and property.

Gianna Bern is an Associate Teaching Professor of Finance in the Mendoza College of Business. She is the author of the business textbook, Investing in Energy: A Primer to the Economics of the Energy Industry published by Wiley 2011. She is also a founding principal of Chicago-based Brookshire Advisory and Research, Inc. a research and consulting firm focused on the energy sector.
